

Supakwik Water Heaters Pty Ltd

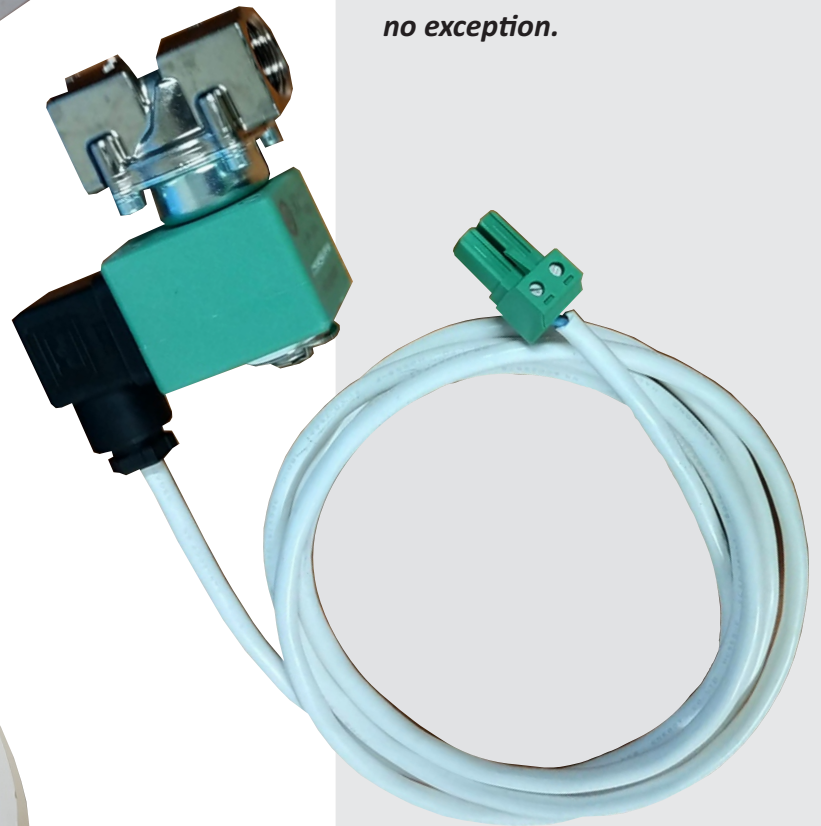

Supaflush Water Saving Systems

Available in Wall & Ceiling Mount
Battery or Mains Operated

Our natural resources are extremely precious, today, more than ever before. Supakwik, in the design of all its products, places high regard to the preservation of these resources. Our automatic water savers are no exception.

Setting up your flush configuration has never been this easy

Shown without battery & battery cover.

All Supakwik's products are tested & comply with all relevant Australian Regulatory requirements.

Supaflush Water Saving Systems

Wall Mountable Sensor

Australian Designed, Manufactured & Owned Unlike most competitor product, when you purchase any Supakwik product you can be confident in the knowledge that you are purchasing a world class product, designed and manufactured in Australia, by a wholly owned Australian Company.

Aesthetically Pleasing The bright white flush mounted ceiling housing will compliment any decor.

Energy Efficient - Battery Operated This extremely energy efficient battery operated water saver eliminates the need of providing costly power points in the ceiling cavity. This allows greater flexibility in installation options with the added advantage of cost reduction.

Robust Rust Free Sensor Housing Washrooms traditionally have very humid environments. All Supakwik's sensor housing are moulded from rigid ABS. This ensures a rust free product which will not deteriorate or stain the ceiling panels.

Extremely Reliable All materials and componentry used in the manufacture of Supakwik's products are of the highest quality, ensuring the maximum life of the product whilst still remaining economical.

Normal Operation Indicator A visible Green LED intermittently flashes, giving you complete peace of mind that the system is functioning as it should.

Battery Condition Indicator A visible RED LED will intermittently flash when the battery condition has deteriorated to the point whereby it must be replaced. The system will continue to work for a period of time after this occurrence. The battery should be replaced as a priority.

Fully Enclosed Unit The unique design of this fully enclosed water saver, reduces the ingress of dust and moisture which substantially increases system life.

Reduced Operating Costs The system operates on a 9 volt battery pack. Apart from delivering exceptional long life performance, the battery pack is user replaceable, further reducing operation costs.

Comprehensive Warranty

Although a substantial amount of effort has goes into the design and manufacture of all our products to ensure maximum reliability, you can be assured we provide an excellent warranty service in the unlikely event you need it.

Excellent Support

Supakwik prides itself on excellent product support. If you ever have a need for product assistance a call to Supakwik will not be answered by a multiple selection recorded message, but by a real individual, whom will give you direct access to one of the engineers who designed your appliance. That's the type of support you can expect from Supakwik!

Optional Extras

Supakwik manufactures a range of air breaks suitable for use with water saving systems.
