## On Wall Boiling Water

A standard range of reliable extremely compact, efficient, fully automatic wall mounted automatic boiling water appliances incorporating advanced features, having stood the test of time.

### Australian Designed and Manufactured

You can be confident in the knowledge that you are purchasing a world class product, time tested, sold internationally, designed and manufactured in Australia since 1999.

### Extremely Reliable

All materials and componentry used in the manufacture of Supakwik's products are of the highest quality, ensuring the maximum life of the product whilst still remaining economical.

### Energy Efficient

With the ability to keep the water within 0.5 of a degree of the set point, you don't waste energy by over heating the water and generating steam. This means boiling water will be ready as you need it, at the precise temperature.

### Simple to use

Although the wall mounted series has been designed to incorporate many features to meet the requirements of it's users, the product is still simple to use and maintain.

### Simple to Install

The ability to interchange the Inlet & Vent fitting locations makes positioning and connection a very simple task. No more crossing over pipework when replacing existing product. This feature also makes maintenance a breeze.

### Environmentally Friendly

Our manufacturing facility utilises solar power technology to achieve net zero energy consumption.

### Power Saving

By utilising Motion Sensing our Supaboil series provides industry leading power saving technology.

### Comprehensive Warranty

Although a substantial amount of effort has gone into the design and manufacture of all our products to ensure maximum reliability, you can be assured we provide an excellent warranty service in the unlikely event you need it.

### Excellent Support

Supakwik prides itself on excellent product support. If you ever have a need for product assistance a call to Supakwik will not be answered by a multiple selection recorded message, but by a real individual, whom will give you direct access to one of the engineers who designed your appliance. That's the type of support you can expect from Supakwik!
