

Supakwik Water Heaters Pty Ltd

Supaboil M Series

Supakwik's range of simple to use, reliable, efficient, fully automatic wall mounted boiling water appliances incorporating advanced technology, delivering world leading performance.

Supaboil's Patented Power Saving Technology - your guarantee to Maximum Energy Efficiency - No programming required.

Your Supaboil incorporates patented motion detection technology. This feature ensures maximum energy efficiency by monitoring your presence and boiling water usage. The appliance then either reduces the temperature or switches itself off completely dependant on your usage pattern. The appliance will then wake automatically and be on temperature ready for use when you need it. No complicated programming of timers needed.

Supaboil's Power Management Feature

Supaboil's patented Motion Detection Technology together with the 'Power Management' feature introduced to the industry in the late 90's ensures maximum energy efficiency without the need for complicated programming and setting of timers - Efficiency simply happens automatically.

Supasilent Standby Operation

Both the Supaboil and Kwikboil include the 'Supasilent' standby mode, meaning you no longer need to put up with the noise of the water been periodically re-boiled. This feature makes the units ideal for installation in hospitals, boardrooms, schools, libraries or any other area where the periodic noise of water being re-boiled is likely to be of a concern.

Simple to Install

Supakwik's unique inter placement of Inlet & Vent fittings locations makes choice of positioning and connection a very simple task. No more crossing over pipework when replacing existing product. This feature also makes maintenance a breeze.

Australian Designed and Manufactured

Whether your choice is for the Supaboil or the Kwikboil you can be confident in the knowledge that you are purchasing a world class product, sold internationally, designed and manufactured in Australia since 1999.

Safe & Reliable

Several built in safety features ensure failsafe protection. An optional extra safety tap to prevent accidental use can be provided upon request. All of the materials and products used to manufacture all of Supakwik's products are of the highest quality, ensuring the maximum life of the product whilst still remaining economical.

Australian Made

Comprehensive Warranty

Although a substantial amount of effort has gone into the design and manufacture of all our products to ensure maximum reliability, you can be assured we provide an excellent warranty service in the unlikely event you need it.

Excellent Support

Supakwik prides itself on excellent product support. If you ever have a need for product assistance a call to Supakwik will not be answered by a multiple selection recorded message, but by a real individual, whom will give you direct access to one of the engineers who designed your appliance. That's the type of support you can expect from Supakwik!

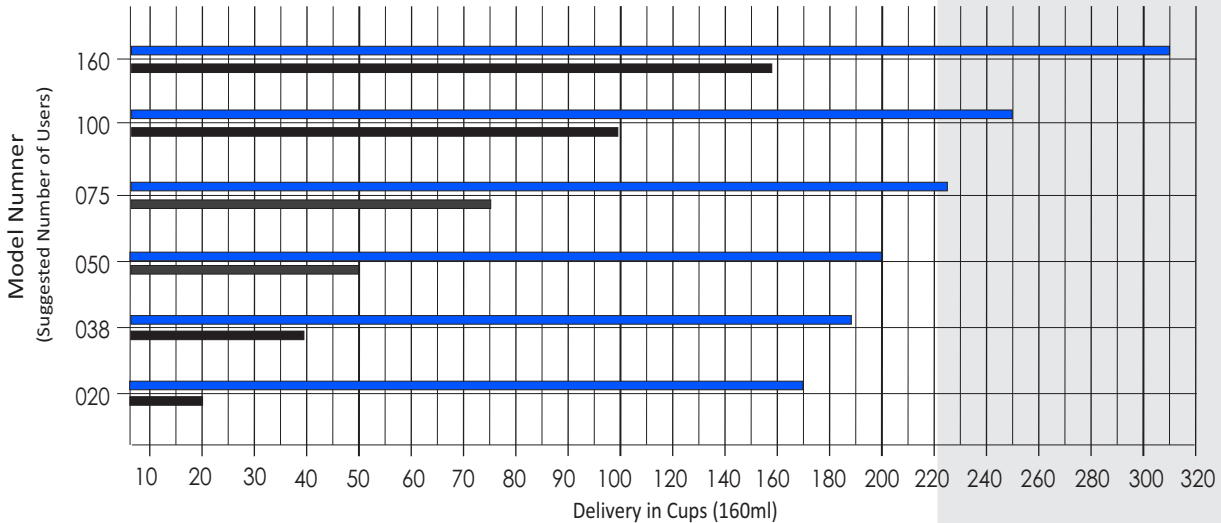

Model	Delivery		Nominal Capacity (litres)	Recovery cups/min		Rating (kW)	Dimensions (H x W x D)
	160ml	200ml		160 ml	200ml		
MA - Supaboil Range - 2 Year Warranty - Powder Coated Bright White Case							
MA0204	20	15	3	2.5	2	2.4	372 x 259 x 154
MA0384	38	30	6	2.5	2	2.4	422 x 312 x 171
MA0504	50	40	8	2.5	2	2.4	512 x 312 x 171

MC - Supaboil Range - 2 Year Warranty - Brushed Stainless Steel Case							
MC0204	20	15	3	2.5	2	2.4	372 x 259 x 154
MC0384	38	30	6	2.5	2	2.4	422 x 312 x 171
MC0504	50	40	8	2.5	2	2.4	512 x 312 x 171

Model Selection Chart

The chart below shows the quantity of cups that will be delivered in a continuous draw off from full to empty for the various models together with the first hour delivery.

Per Hour
Initial Draw

Nominal recovery rate per hour on all heaters for a 160ml cup is 150 cups, therefore the initial delivery per hour for the M..020 is 20 cups + 150 cup = 170 Cups. Similarly the initial delivery per hour of the M..160 is 160 cups + 150 cups = 310 Cups
